

PART	DESCRIPTION	FEATURES	APPLICATIONS
8106	8 oz. Absorbent pad with a covering of porous polyethylene material.	<ul style="list-style-type: none"> -Soft pad with nonadherent film -Excellent rate and capacity of fluid uptake -Very comfortable to wear 	-Wound dressings
8103	Breathable, clear urethane film, laminated to an 8 oz. absorbent pad, with a porous PE covering on the opposite side.	<ul style="list-style-type: none"> -Very soft and conformable -High MVTR (breathability) -Water resistant film -Highly absorbent pad with nonadherent film -Prevents fluid strike-through 	-Wound dressings
8059	Absorbent hydrocolloid laminated on one side with a clear film for support. The opposite side is protected by a release liner.	<ul style="list-style-type: none"> -Very moisture absorbent -Very slow to erode or dissolve in aqueous fluids -Excellent skin adhesion -Nonirritating, nonsensitizing -Laminated film can be either breathable urethane or occlusive polyethylene, depending on end use application 	<ul style="list-style-type: none"> -Attachment of medical devices to skin. Especially for long term attachment or sites of repeated attachment and removal, like ostomy. -Absorbent wound dressings
8060	Absorbent hydrocolloid laminated on one side with a 1/32" white polyethylene closed cell foam. The opposite side is protected by a release liner.	<ul style="list-style-type: none"> -Very moisture absorbent -Very slow to erode or dissolve in aqueous fluids -Excellent skin adhesion -Nonirritating, nonsensitizing -Polyethylene foam provides additional support 	<ul style="list-style-type: none"> -Attachment of medical devices to skin. Especially for long term attachment or sites of repeated attachment and removal, like ostomy.
